ENhance REseArChers and HEI staff skills and competences in data management and research integrity to increase academia collaboration capacity

The ENREAC-HEI project aims to develop and test a MOOC course on Research skills and Open Science practices, addressed to Higher Education students to increase their skills and competences in research management, open science techniques, collaboration and teamwork.

[E-learning course](#)

A free online course on Essential Research and Open Science Skills!

www.enreachei-project.eu

Open Data e-learning platform and digital tools for participatory decision making.

The OpenMakers project aims to broaden ICT competences creating sustainable and needs-focused learning patterns, enabling non-profits/public bodies/informal groups to act at local level through open data interpretation and management.

[E-learning platform](#)

It fosters the usage of open data among the public, supporting their local work through innovative training in digital literacy combined with open data learning/usage and it is available in 7 languages: English, Greek, Spanish, Italian, Hungarian, Finish and Turkish.

Learning qualification will be issued through the Open Badge System.

www.open-makers.eu

Social-Ecological approaches for care-leavers inclusion through participatory policymaking.

The Stand By Me project aims to strengthen the participatory decision-making process for the development of a Working Protocol, shaping enabling pathways for children ageing out of alternative care.

Gameboard

An open-source board game, an educational tool that policy-makers can use to support young people and adults (14+ years old) who are leaving the care system to think and act independently.

Available in 5 languages: English, Greek, Italian, Romanian and Swedish.
