

Shaping the future of the events & travel industries, pixel by pixel.

We develop software solutions to empower businesses around the globe and help them increase in-house productivity while providing better customer service and experiences.

Smartape

Spurring Innovation.

Our mission is to empower industry professionals with exceptional software and innovative business solutions, which will radically transform the way they work and bring positive change to the events and travel industries.

We create digital products that aim to make people's lives easier.

Accommodation & Travel Booking CRM

Advanced Accommodation Management & Travel Booking software aimed to increase ROI by automating and optimising the current business workflow for an international travel agency

Real Estate PMS & CRM

One of the biggest Real Estate agencies in Cyprus, has trusted us to redesign and develop a fully custom Property Management System (PMS) and CRM to run its core business.

Travel & Tourism

Local travel agency that compares the top global travel sites to provide customers with the best prices for their holidays in one simple platform. We integrated multiple API's to aggregate prices presented on a web / mobile app.

Event Management Software

An end-to-end revolutionary event management software, made to provide event organisers with an environmentally friendly, innovative and powerful solution, which enables them to plan, measure and grow professional events of any size.

We create digital products that aim to make people's lives easier.

CSR Analytics Pro

Smartape developed a cloud-based SaaS software based on ISO 26000 for Corporate Social Responsibility. The system was designed to take into account legal, economic, environmental, social, ethical, consumer and human rights concerns, to help companies identify current gaps, engage stakeholders, prioritise material issues, set actions and KPIs, draft a sustainability strategy and track performance over time, thereby becoming more resilient.

SET Protocol

An Autonomous Interoperable Blockchain system that aims to offer a transparent, secure and efficient ticketing solution.

The S.E.T. Protocol ecosystem is built on the core value of providing transparency, security and fairness to the ticketing process, to organizers and ticket buyers.
