

## About the Project

The project “EventApe S.E.T Protocol - an **Autonomous Interoperable BlockChain system that aims to create transparent, secure and efficient smart ticketing contracts**” aims to bring to the forefront the notion of interoperability for BlockChain system, through the creation of a safe and efficient ticketing solution. An ecosystem will be created based on the values of providing transparency, security, and fairness to the ticketing process, a result that will benefit both organizers and ticket buyers, as well as event attendees.

## Expected Benefits

S.E.T Protocol will provide a number of beneficial features for both **Event Attendees** and **Event Organizers**, including:

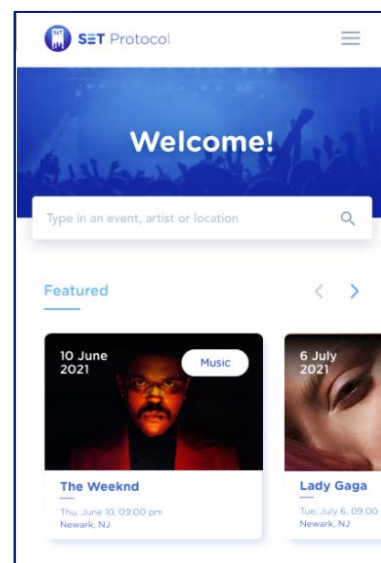

- Immediate access to tickets via S.E.T Protocol’s website & mobile application.
- Creation of events and selling of tickets via a cloud-based Blockchain ticketing platform.
- Ability to resale tickets anonymously.
- Elimination of fraud and prevention of duplicate tickets from appearing.
- Secure & transparent payment transactions.
- Fairer pricing, lower prices, and discount deals as companies don’t have to pay for third-party services.
- 100% guarantee that the ticket bought is genuine and not fake.

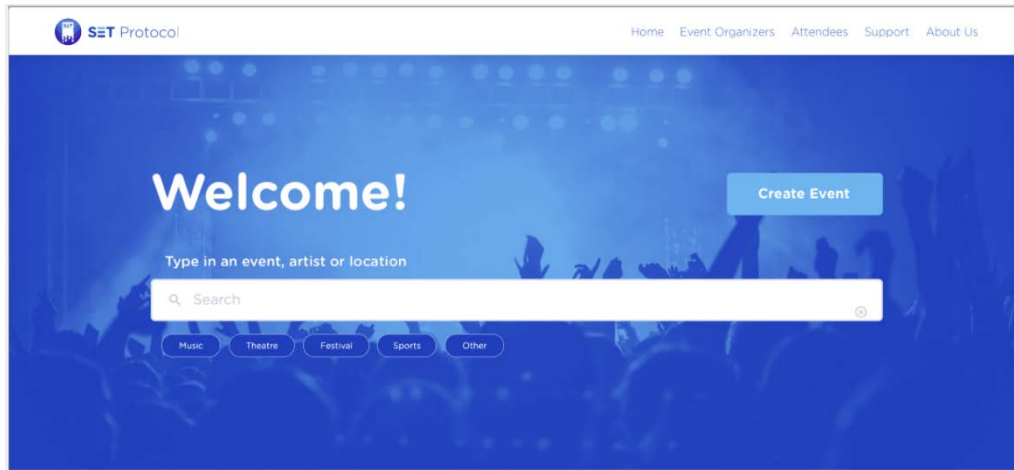

## Our News

The partners of the project are currently in the final stage for the development of the **S.E.T Protocol ecosystem**, which will be distributed to the public in the following months. Software testing and quality assurance will ensure the proper functionality of the system, while the identification of potential issues or bugs will contribute to its improvement.

The **final product** will important features, including:

- Permanent regulation of the complex global issue of scalping and secondary ticket market.
- A user-friendly experience for event attendees
- Guarantee of fairer pricing and lower prices.
- Integration of all possible business-related aspects, to optimize time sequences and money for event organizers.

## What's Next

### Online Piloting Event

In order to finalize the product and improve it according to the expectations of managers, attendees, and fans, the partners will implement an **online testing event**. During the event, various end-users will have the opportunity to experience the software, see the available features, and provide their feedback and suggestions.

The obtained results will provide an overview of what needs to be improved, in order to achieve a better software design and understand users' needs.

### SAVE THE DATE!

The event will be held online, via the ZOOM platform, on **18 March 2021 (15:00)**. Interested users (event managers/attendees, artists, sports managers) can submit their applications [HERE](#).

### Final Conference

The final conference will be organized towards the end of **March 2021**, with the purpose to disseminate the results of the S.E.T Protocol project and demonstrate the final product to the end users. The conference will be held **online** and will include an open discussion regarding the benefits of Blockchain technology, current trends in the ticketing industry, and the innovativeness that S.E.T Protocol will bring to the ticketing market.

***More information will be available soon!***
