

About the Project

The project “**EventApe S.E.T Protocol - an Autonomous Interoperable BlockChain system that aims to create transparent, secure and efficient smart ticketing contracts**” aims to bring to the forefront the notion of interoperability for BlockChain system, through the creation of a safe and efficient ticketing solution. An ecosystem will be created based on the values of providing transparency, security, and fairness to the ticketing process, a result that will benefit both organizers and ticket buyers, as well as event attendees.

Expected Benefits

S.E.T Protocol will provide a number of beneficial features for both **Event Attendees** and **Event Organizers**, including:

- Immediate access to tickets via S.E.T Protocol’s website & mobile application.
- Creation of events and selling of tickets via a cloud-based Blockchain ticketing platform.
- Ability to resale tickets anonymously.
- Elimination of fraud and prevention of duplicate tickets from appearing.
- Secure & transparent payment transactions.
- Fairer pricing, lower prices, and discount deals as companies don’t have to pay for third-party services.
- 100% guarantee that the ticket bought is genuine and not fake.

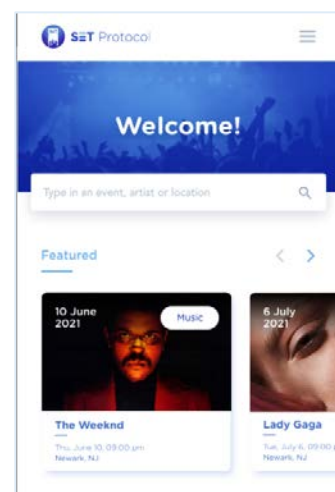

Our News

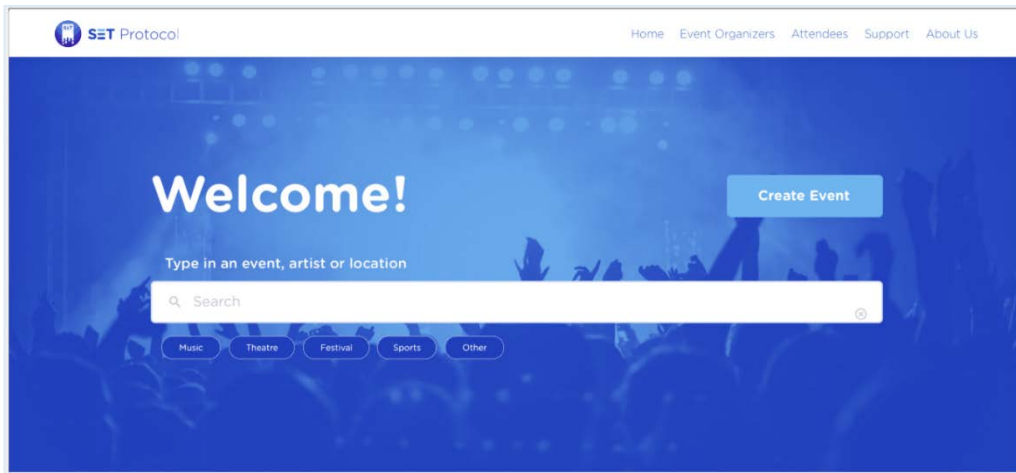

We are proud to announce that our project has almost reached its end! After two years of hard work, the S.E.T Protocol will become available as a mobile application and a website, allowing attendees to search for events & news, and securely purchase their tickets.

When it comes to create tickets for events facing the ticket scalping problem, S.E.T Protocol will provide the ability Blockchain tickets, thus regulating maximum resale prices and the maximum number of tickets purchased by a single buyer.

DID YOU KNOW?

The word S.E.T stands for “**Smart Event Tickets**”. In the past two years, we have accomplished to develop a unique platform, offering maximum efficiency, transparency, and security for Event Organizers, Content Creators, and Attendees.

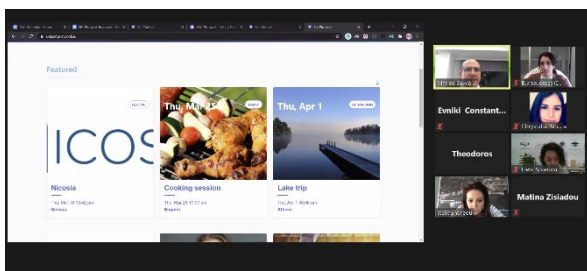

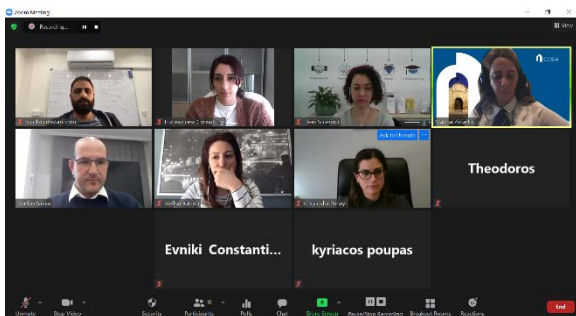

Online Testing Event

The online testing event was implemented on March 18, through the ZOOM platform. During the event, the participants tested various scenarios on the S.E.T Protocol platform, in order to identify potential bugs and errors, and provide feedback on the structure and functionality of the system.

The obtained results has helped us understand what needs to be improved, thus creating a better software experience according to the expectation of event managers, attendees, and fans.

What's Next

BLOCKCHAIN AND TICKETING

Introducing a new platform: Challenges and Opportunities

Join the #setprotocol team for one final online event! Participants will be introduced to our innovative platform, and engage in an open discussion on the challenges & opportunities of blockchain technology and the ticketing industry.

Follow the details of the event on [Facebook](#)

SAVE THE DATE!

The event will be held online, via the ZOOM platform, on **30 March 2021 (17:00)**. Interested users (event managers/attendees, artists, sports managers) can submit their applications [HERE](#).
